

Rive Roshan

Curriculum Vitae

Rive Roshan is an experimental design studio working on the cusp of design and art, run by Ruben de la Rive Box and Golnar Roshan. Rive Roshan create to connect with people intuitively through exploring visual wonder as a means to emotional well-being. Through experimental processes they design immersive spatial experiences, materials and object that enrich lives. A deep interest in colour, texture and materiality leads to an aesthetic of raw beauty.
